

SINAMICS Drives

ROBICON W120 enclosed drive

1 HP to 200 HP

Introduction

This technical data sheet provides a short overview of the most important characteristics of the ROBICON W120 enclosed standard 6-pulse drive from Siemens, developed specifically to meet specifications in the municipal water and waste water market.

A result of the powerful combination of SINAMICS®, the most advanced drives technology platform, and the ROBICON legacy of more than 20 years of quality and expertise in the water and waste water industry, the W120 makes the best even better.

The ROBICON W120 is a stand-alone variable speed enclosed drive for non-regenerative single motor applications with variable or constant torque loads. This compact and quiet drive uses IGBT power semiconductors and an innovative cooling concept. The drive can be operated in either Volts/Hertz or sensorless vector control modes.

Standard features

The standard drive enclosure is either a wall mount box or a floor standing cabinet, which can be equipped with a wide variety of pre-engineered and custom options. The ROBICON W120 has the following standard features:

- NEMA 1 enclosure, with blowers (optional NEMA 12 ventilated with air filters)
- UL listing per UL508C
- Short circuit current rating (SCCR) 65 kA at 480 V AC
- Circuit breaker disconnect with flange mount operator handle, mechanically interlocked with the enclosure door
- Input line reactor
- Intelligent operator panel (IOP), door mounted for easy start-up and operation
- Windows based STARTER software – common to all models of the SINAMICS family

1) The input current is based on the input current of the power module and includes an allowance of 2.0 A (≤ 60 HP) or 2.5 A (> 60 HP) for auxiliary circuits.

The standard ROBICON W120 base enclosed drive includes:

- NEMA 1 enclosure
- UL508C listing (file no. E319311)
- Short circuit current rating (SCCR) 65 kA at 480 V AC
- Power module PM240 (standard 6-pulse)
- Input line reactor
- Circuit breaker disconnect with mechanical door interlock
- Intelligent operator panel (IOP), door mounted and wired
- Integral braking chopper
- Cable entry top or bottom, line and motor side

Controller CU230P-2 HVAC with:

- RS485 serial communications port USS / Modbus RTU / BACnet MS/TP
- 6 digital inputs, 24V 15 mA, optically isolated (group)
- 3 relay outputs, 2x form C 250 VAC 2 A or 30VDC 5 A, 1x NO 30 VDC 0.5 A
- 4 analog inputs, 2x differential -10V to +10V or 0/4 to 20mA, 1x 0/4 to 20mA or temperature sensor, 1x temperature sensor input for Ni1000/Pt1000 sensor
- Input for temperature sensor KTY84, PTC thermistor or thermostat
- 2 analog outputs, 0 to +10V or 0/4mA to 20mA, 1x 0/4mA to 20mA, non-isolated

NOTE: Some of the control unit inputs and/or outputs may be used for options.

Standard Options

Option Code	Description	Option Code	Description
Enclosure Options		Control Options	
M12	NEMA 12 filters	E86	Isolation amplifier for one analog input
L50	Cabinet light and outlet	E87	Isolation amplifier for two analog outputs
L55	Cabinet space heaters (120VAC)	K20	Pilot lights (qty. 3), door mounted – Ready, Run, Fault
L56	Motor space heater supply	K21	Additional local controls (L-R & H-O-A, speed pot, Start/Stop p/b)
Y09	Special enclosure paint color [specify color]	K22	Elapsed time (hour) meter, door mounted, non-resettable
Power Circuit and Protection Options		L87	Ground fault monitor for ungrounded supplies (75 - 200 HP only)
L08	Output reactor	L97	RTD monitor for 8x Pt100 temperature sensors
L10 ¹⁾	Output dV/dt filter	N55	ALL STOP mushroom pushbutton, latching, coast to stop
L13	Input isolation contactor	Communication Bus Options	
L15 ¹⁾	Output sinusoidal filter	G81	PROFIBUS DP communication port
L24	5% input reactor	G82	EtherNet/IP or PROFINET communication port
L27	Input fuses	Other Options	
L28	Two contactor manual bypass (output/bypass contactors with o/l)	H20	Seismic certification per IBC 2012 (provide specification)
L29 ¹⁾	Reduced voltage soft start (RVSS) manual bypass (75 - 200 HP only)		
L32	Output isolation contactor		
L63	Braking resistor		
L96	Input surge protective device		
L98	Motor thermal overload relay (already included in L28)		
L99	Motor protection relay (Multilin 369) (75 - 200 HP only)		
P10	Input voltage monitor (Siemens type 3UG4)		

¹⁾ These options require a larger or additional enclosure as follows:

For wall mount drives, these options are provided in separate enclosures. These separate enclosures are available as NEMA 1 only (also if the drive enclosure is ordered with option M12 NEMA 12 filters) and are listed to UL508A.

For floor standing drives, these options are provided in a larger enclosure (add-on options cabinet). Option M12 adds NEMA 12 filters to both the drives and attached add-on enclosures.

Options in the add-on or separate cabinet may be listed to UL508A.

Note: Please consult factory for additional/custom options.

Design Data – 1 to 60 HP

Wall Mount Drive Enclosure

Notes:

- To assure proper air circulation, please allow minimum 6" (1–20 HP) respectively 12" (25-60 HP) space between adjacent wall mount drive enclosures or to a side wall.
- Dimensions are nominal for enclosure, tolerance 0.5" (12 mm), excluding protruding components. Please refer to drawings for exact details.

Technical Data

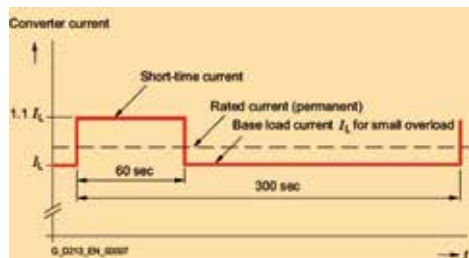

Electrical data				
Supply voltages and output ranges	460 V to 480 V 3 ph AC, ±10%, 1 to 200 HP			
Supply systems	Grounded or ungrounded supplies			
Line frequency	47 Hz to 63 Hz			
Output frequency	0 Hz to 266 Hz (650 Hz with derating)			
Power factor fundamental approx.	0.95			
Drive efficiency	93 to 97%			
Short circuit current rating	SCCR 65kA			
Control method	V/Hz control, V/Hz with flux current control (FCC), sensorless vector control (SVC).			
Fixed speeds	16 fixed frequencies			
Skipped frequency ranges	4, programmable			
Braking operation	Integral brake chopper for dynamic braking			
Mechanical data				
Type of enclosure and color	NEMA 1, optionally NEMA12 (ventilated), ANSI 61 gray			
Type of cooling	Forced air ventilation			
Noise level L _{pA} (1 m)	45 to 69 dB(A) at 60 Hz line frequency			
Environmental protection	Nickel plated busbars, varnish coated electronic boards			
Compliance with standards				
UL listing	Listed to UL508C, file no. E319311			
Ambient conditions		Operation	Storage	Transport
Ambient temperature		32°F to 104°F (0°C to +40°C) Up to +122°F/+50°C with derating	-13°F (-25°C) to 131°F (+55°C)	-13°F (-25°C) to 158°F (+70°C) Down to -40°F (-40 °C) for 24 hours
Relative humidity (non-condensing)		5% to 95%	5% to 95%	5% to 95% at 40°C
Installation altitude		Up to 3,300 ft (1000 m) above sea level without reduction in performance, > 3,300 ft see derating data		

Engineering Information

Overload ratings

The ROBICON W120 drive may be operated with both variable torque and constant torque loads at either light or high overload duties. The criterion for overload is that the drive is operated with its base load current before and after the overload occurs.

Light overload duty is based on 110% base load current for 60 sec or 150% for 3 sec, repeated every 300 sec.

Light overload

High overload duty is based on 150% base load current for 60 sec or 200% for 3 sec, repeated every 300 sec.

Motor and drive sizing

Service Factor must be considered for motors operating at Service Factors beyond 1.0. Please consult factory for assistance sizing the drive.

For motors with ratings larger than the drive, please consult factory as nuisance tripping may occur if drive is not properly sized.

In sensorless vector control, the rated motor current (FLA) must be at least 1/4 of the rated drive output current. With lower motor currents, operation is possible in Volts/Hz control mode only.

Intelligent operator panel (IOP)

The SINAMICS IOP makes it easy to operate, commission and diagnose faults on the drive. Up to two process values can be displayed on the screen either graphically or numerically. Process values can be displayed in the appropriate technological units. The user language can be selected.

Due to the large plain text display, menu prompting and application wizards, commissioning of drives is very quick.

Parameters are displayed in plain text, explanatory help texts are provided and there is a parameter filter function. The user is interactively navigated through commissioning of common applications such as pumps, fans, compressors and conveyors using application wizards.

The IOP has a dedicated key to toggle between local (from IOP) and remote control.

Fault diagnosis is in a user-friendly fashion using plain text display of faults and alarms. Explanatory help texts are provided by pressing the INFO key.
